First Prompt

Suggest 10 unique, SEO-friendly blog post titles for a blog in the [CATEGORY NAME] niche, focusing specifically on a micro-niche within it. The titles should target long-tail, low-competition keywords that are easier to rank for on Google. Avoid generic or broad titles. Each title must be engaging, naturally written, and offer clear value to the reader such as solving a problem, providing tips, or answering a common question. The titles should reflect current search trends and have ranking potential in 2025. Mention the micro-niche you're focusing on before generating the titles.
